OCTOBER got its name from the Latin word, *octo*, meaning eight (8) because it was once the 8th month in the Roman calendar. (Later the months of January & February were added to complete winter.)
TRIVIA: October, with its beautiful changing foliage, is one of the most colorful months of the year. Leaves display vibrant hues of **golden yellow**, **chestnut brown**, **royal purple**, **pumpkin orange**, and **rusty red**. In the summertime, the active chlorophyll in the leaves turn sunlight into food which keeps the leaves **green**. In Autumn the leaves are showing their **TRUE COLORS** because the chlorophyll is no longer activated by the sun.

FLOWER: The **CALENDULA**, is a golden-yellow flower and is a member of the sunflower family. The petals have been used in cooking, to give cheeses their yellow color, and for folklore medicine.
BIRTHSTONE: The **OPAL** – over 90% of the world’s opals come from Australia. The **OPAL** symbolizes hope and purity.
QUOTE: “October is the month when the smallest breeze gives us a shower of autumn leaves. Bonfires! Pumpkins! Leaves sailing down! October is red and golden and brown.” (Author unknown)
