(Later the months of January & February were added to complete winter.)</p> <p>TRIVIA: October, with its beautiful changing foliage, is one of the most colorful months of the year. Leaves display vibrant hues of golden yellow, chestnut brown, royal purple, pumpkin orange, and rusty red. In the summertime, the active chlorophyll in the leaves turn sunlight into food which keeps the leaves green. In Autumn the leaves are showing their TRUE COLORS because the chlorophyll is no longer activated by the sun.</p> <p>FLOWER: The CALENDULA, is a golden-yellow flower and is a member of the sunflower family. The petals have been used in cooking, to give cheeses their yellow color, and for folklore medicine.</p> <p>BIRTHSTONE: The OPAL – over 90% of the world's opals come from Australia. The OPAL symbolizes hope and purity.</p> <p>QUOTE: "October is the month when the smallest breeze gives us a shower of autumn leaves. Bonfires! Pumpkins! Leaves sailing down! October is red and golden and brown." (Author unknown)</p>
